

AOS Supplier Code of Conduct

Alpha and Omega Semiconductor Limited and its consolidated subsidiaries (collectively, “Alpha and Omega Semiconductor”, or “AOS”) are committed to the highest standards of product quality and business integrity in all relationships with our suppliers and business partners. AOS also commits to ensuring that working conditions in our supply chain are safe, that workers are treated with respect and dignity, and that manufacturing processes are environmentally and socially responsible.

This AOS Supplier Code of Conduct (“Code”) sets forth our expectations for all AOS’s suppliers, contractors and service providers (“Suppliers”), aims to communicate the basic principles of doing business with companies of the AOS to all Suppliers and to regulate them in a binding manner, and is aligned with UN Guiding Principles and Human Rights, which we have adopted as a guiding framework.

As a condition of doing business with AOS, we expect our Suppliers to conform to these requirements and communicate this Code to their suppliers to acknowledge and implement its requirements. Fundamental to adopting the Code is the understanding that a business, in all of its activities, must operate in full compliance with applicable laws, rules, and regulations. AOS may visit Supplier facilities to assess compliance to these requirements and will consider Suppliers’ conformance when making sourcing and procurement decisions. In the case of willful misconduct, or upon the occurrence of any events, which constitutes a breach of the Code, Suppliers agree that AOS has the right to immediately terminate the business relationship without reason or condition. Seller also acknowledges that BUYER holds the right for any legal action against Seller for any breach of applicable laws or regulations that may be subject to prison sentence and/or penalties. In addition, Seller shall be liable to pay and compensate all loss incurred by BUYER in connection with such breach.

A. LABOR

Suppliers are committed to uphold the human rights of workers, and to treat them with dignity and respect as understood by the international community. This applies to all workers including temporary, migrant, student, contract, direct employees and any other type of worker.

1) Prohibition on Forced or Compulsory Employment or Labor

Suppliers are committed to ensuring that all work is voluntary and throughout their supply chain. AOS strictly prohibit forced, bonded (including debt bondage) or indentured labor, involuntary prison labor, slavery or trafficking of persons, which includes the transportation, harboring, recruitment, transfer, or receiving vulnerable persons by means of threat, force, coercion, abduction or fraud for the purpose of exploitation or forced labor. Workers’ movement shall not be restricted with regards to Suppliers’ facilities. Suppliers to ensure that the terms of employment are clear, as are the terms of termination of employment, which includes commitment to not destroying, concealing, confiscating or denying access by workers to their identity or immigration documents (if relevant), such as government-issued forms of identification, passports or work permits, unless such holdings are required by law. In addition, workers are not required to pay recruitment fees or other related fees regarding their employment, and when it is found that such fees have been paid, the worker shall be reimbursed.

2) Prohibition of Child Labor

Suppliers must strictly prohibit the use of child labor. Suppliers must not consider anyone for employment under the minimum age for employment established by local laws. AOS will cease work with Suppliers that are found to use child labor, and the relevant Supplier will be required to take a number of steps in order to assure that it no longer engages in child labor practices henceforth.

3) Fair and Transparent Employment Practices

Suppliers' workers are afforded wages and benefits according, at least, to the minimum standards or better set up in our countries of operation. Compensation paid to workers complies in all material aspects with all applicable labor and wage laws, including those governing minimum wage, overtime hours and legally mandated benefits such as pension, retirement, health care and parental leave, among others.

4) Human Rights and Non-Discrimination in the Workplace and Conflict Minerals Commitment

Suppliers must work to uphold high standards of ethical behavior and human rights. Suppliers must ensure that there is no harsh and inhumane treatment of their workers including unlawful sexual harassment, abuse, corporal punishment, mental or physical coercion or verbal abuse, or that any threats are issued.

Suppliers are to uphold a strict policy of non-discrimination in the workplace, including ensuring a workplace that is free of unlawful harassment, and strive to uphold and protect equal rights for minority groups and women. Suppliers must not engage in any forms of unlawful discrimination based on race, color, age, gender, sexual orientation, gender identity and expression, ethnicity or national origin, disability, pregnancy, religion, political affiliation, union membership, veteran status, protected genetic information or marital status in their hiring and employment practices including wages, promotions, rewards and access to training.

AOS is committed to ethical sourcing and works to ensure that our Suppliers uphold humane employment and sourcing practices. As such, we established a conflict minerals policy which has been posted on our website at <https://www.aosmd.com/our-social-responsibility> (under Supplier Partnerships section) for third party references.

5) Freedom of Association and Collective Bargaining

Open communication and direct engagement between workers and management are the most effective ways to resolve workplace and compensation issues. The rights of workers to associate freely, bargain collectively (including through their chosen representatives), engage in peaceful assembly, form and/or join - or to refrain from participating in - labor unions, seek representation, and join workers' councils in accordance with local laws shall be respected. Workers shall be able to openly communicate and share ideas, concerns and grievances with management regarding working conditions and management practices without fear of reprisal, discrimination, intimidation or harassment. Where the right of freedom of association and collective bargaining is restricted by applicable laws and regulations, workers shall be allowed to elect and join alternate lawful forms of worker representations.

B. HEALTH and SAFETY

Suppliers recognize that in addition to minimizing the incidence of work-related injuries and illnesses, a safe and healthy working environment enhances the quality of products and services, consistency of production and worker retention and morale. Suppliers also recognize that ongoing worker participation and training is essential to the continuous improvement of occupational health and safety in the workplace.

1) Occupational Health and Safety

Worker exposure to potential health and safety hazards (e.g., chemical, electrical and other energy sources, combustible dust, fire, vehicles and fall hazards) are to be identified and assessed, and mitigated using the Hierarchy of Controls. Hierarchy of Controls means: (1) Elimination, (2) Substitution (3) Engineering controls (4) Administrative controls and (5) Personal Protective Equipment (PPE). Where hazards cannot be adequately controlled by these means, workers shall be provided with appropriate, well-maintained, personal protective equipment and educational materials about risks to them associated with these hazards. Gender-responsive measures shall be taken, such as not having pregnant women/nursing mothers in working conditions which could be hazardous to them or their child and to provide reasonable accommodations for nursing mothers. Workers shall have the right

to refuse unsafe work and to report unhealthy working conditions, and shall be encouraged to raise safety concerns. Suppliers shall obtain, maintain and comply with all required health and safety permits.

2) Emergency Preparedness

Potential emergency situations and events shall be identified and assessed, and their impact minimized by implementing emergency plans and response procedures including: emergency reporting; employee notification and evacuation procedures; worker training and drills. Emergency response drills and evacuation drills shall be executed at least semi-annually or as required by local law, whichever is more stringent. Emergency plans shall also include appropriate fire detection and suppression equipment; clearly marked and unobstructed egress; adequate exit facilities; contact information for emergency responders and recovery plans. These plans and procedures must focus on minimizing harm to life, the environment and property.

3) Fire Safety

Fire safety shall be considered during the full lifecycle of property buildings. Supplier shall develop and implement a program to ensure its fire safety during property design, construction, renovation, utilization, decommissioning processes, and perform fire risk assessment with proper emergency response plans to mitigate risks harm to life, environment, and property.

4) Occupational Injury and Illness

Procedures and systems shall be in place to prevent, manage, track and report occupational injuries and illnesses (and near-misses), including provisions to: encourage worker reporting; classify and record injury and illness cases; provide necessary medical treatment; investigate cases and implement corrective actions to eliminate their causes; and facilitate return of workers to work. Incidents must be reported within 24 hours and root cause investigations shall be completed within 7 calendar days. Suppliers shall allow workers to remove themselves from imminent harm, and not return until the situation is mitigated, without fear of retaliation.

5) Industrial Hygiene

Worker exposure to chemical, biological and physical agents or combustible dust shall be identified, evaluated and controlled according to a documented Hierarchy of Controls. When hazards cannot be adequately controlled, workers shall be provided with and use appropriate, well-maintained personal protective equipment free of charge. Suppliers shall provide workers with safe and healthy working environments, which shall be maintained through ongoing, systematic monitoring of workers' health and working environments. Suppliers shall provide occupational health monitoring to routinely evaluate if workers' health is being harmed from occupational exposures. All medical surveillance shall be conducted at least annually and in compliance with applicable data privacy laws. Results shall be communicated to workers and used to drive hazard reduction. Protective occupational health programs shall be ongoing and include educational materials about the risks associated with exposure to these workplace hazards. Suppliers shall comply with hazard communication standards, including labeling, safety data sheets, and employee training in accordance with OSHA or GHS guidelines.

6) Physically Demanding Work

Worker exposure to the hazards of physically demanding tasks, including manual material handling and heavy or repetitive lifting, prolonged standing and highly repetitive or forceful assembly tasks shall be identified, evaluated and controlled. Suppliers shall establish and implement a written program to properly manage the use of powered industrial trucks, such as forklifts, powered hand trucks, etc. All powered industrial trucks and associated operators must be authorized with necessary licenses before operation.

7) Machine Safeguarding

Production and other machinery shall be evaluated for safety hazards. Physical guards, interlocks and barriers shall be provided and properly maintained where machinery presents an injury hazard to workers. Prior to start-up of new or modified equipment, guarding devices must be checked through safety review to ensure they can function properly and are safe for use; safe machine operation documentation (in a language understood by the worker)

shall be provided. This safety review shall also consider risk assessment of routine and non-routine work on the machines as well as risk control/risk mitigation measures. Manufacturing specifications shall be sufficiently communicated to operators before operations.

8) Sanitation, Food and Housing

Workers shall be provided with ready access to clean toilet facilities, potable water and sanitary food preparation, storage and eating facilities. Suppliers shall conduct periodic risk assessments for worker dormitories and dining facilities. Worker dormitories provided by Suppliers or a labor agent shall be maintained to be clean and safe, and provided with appropriate emergency exits, hot water for bathing and showering, adequate lighting, adequate conditioned ventilation, individually secured accommodations for storing personal and valuable items, and reasonable personal space along with reasonable entry and exit privileges.

9) Health and Safety Communication

Suppliers shall provide workers with appropriate workplace health and safety information and training in their primary language or in a language the worker can understand (or pictorial) for all identified workplace hazards that workers are exposed to, including but not limited to mechanical, electrical, chemical, fire and physical hazards. Health and safety related information shall be clearly posted in the work facility, or in an identifiable and accessible location. Health information and training shall include content on specific risks to relevant demographics, such as gender and age, if applicable. Suppliers shall provide training to all workers prior to commencement of work, and regularly thereafter. Workers shall be encouraged to raise any health or safety concerns without retaliation. Suppliers are encouraged to initiate and support worker health and safety committees to enhance ongoing health and safety education and to encourage worker input on, and participation in, health and safety issues in the workplace.

10) Infectious Disease Preparedness and Response

Each Supplier shall develop and implement a program to take reasonable steps to prepare for, prevent and respond to the potential for an infectious disease among its employees. Supplier shall ensure workers receive appropriate vaccinations and follow all applicable health and safety measures in accordance with local government requirements.

11) Contractor Management

Supplier shall establish and implement a procedure to manage and monitor contractor work onsite in accordance with all applicable health and safety laws and regulations. This includes but is not limited to training for emergency procedures, performing a risk assessment and reporting safety incidents. Suppliers shall ensure contractors undergo site-specific health and safety orientation and are included in the facility's safety programs, including permit-to-work and incident reporting systems.

C. ENVIRONMENT

Suppliers must recognize that environmental responsibility is integral to producing world class products. Suppliers shall identify the actual and potential environmental impacts their operations may have. In manufacturing operations, adverse impacts on the community, environment and natural resources are to be minimized, while safeguarding the health and safety of the community and public. Suppliers are strongly encouraged to establish, implement, and maintain an Environmental Management System (EMS) in line with ISO 14001 or equivalent to ensure continual improvement and compliance with environmental obligations.

1) Environmental Permits and Reporting

All required environmental permits (e.g. discharge monitoring, water usage), approvals and registrations shall be obtained, maintained and kept current, and their operational and reporting requirements shall be followed.

2) Pollution Prevention and Resource Conservation

The use of resources and generation of pollutants and waste of all types, including water and energy, shall be minimized or eliminated at the source or by practices such as modifying production, maintenance and facility processes, materials substitution, conservation, recycling and re-using materials. The use of natural resources, including water, fossil fuels, minerals and virgin forest products, shall be conserved, by practices such as modifying production, maintenance and facility processes, materials substitution, conservation, recycling and re-using materials.

3) Hazardous Substances

Chemicals, waste and other materials posing a hazard to humans or the environment if released to the environment, shall be identified, inventoried and managed to ensure their safe handling, movement, storage, use, recycling or reuse and disposal. Hazardous waste data shall be tracked and documented.

4) Solid Waste

Suppliers shall implement a systematic approach to identify, manage, reduce and responsibly dispose of or recycle solid waste (non-hazardous) to minimize waste to landfills from its operations. Waste data shall be tracked and documented. Suppliers are encouraged to implement circular economy principles such as product end-of-life planning, take-back programs, and closed-loop material flows.

5) Air Emissions

Air emissions of volatile organic chemicals, aerosols, corrosives, particulates, ozone-depleting chemicals and combustion by-products generated from operations shall be characterized, routinely monitored, controlled and treated as required prior to discharge. Ozone-depleting substances shall be effectively managed in accordance with the Montreal Protocol and applicable regulations. Suppliers shall conduct routine monitoring of the performance of their air emission control systems.

6) Materials Restrictions

Suppliers are to adhere to all applicable laws, regulations and customer requirements regarding prohibition or restriction of specific substances in products and manufacturing, including labeling for recycling and disposal.

7) Water and Wastewater Management

Suppliers shall implement a water management program that documents, characterizes and monitors water sources, use and discharge; seeks opportunities to conserve water; and controls channels of contamination. Wastewater generated from operations, industrial processes and sanitation facilities shall be characterized, routinely monitored, controlled and treated as required prior to discharge or disposal. In addition, measures shall be implemented to reduce generation of wastewater. Suppliers shall conduct routine monitoring of the performance of their wastewater treatment and containment systems to ensure optimal performance and regulatory compliance. Suppliers shall implement a systematic approach to prevent contamination of storm water runoff. Suppliers shall prevent illegal discharges and spills from entering storm drains, the public water supply or public bodies of water.

8) Energy Consumption and Greenhouse Gas Emissions

Suppliers shall establish and report against an absolute corporate-wide greenhouse gas reduction goal (e.g. absolute reduction, intensity-based reduction, or both). Energy consumption and all Scope 1, Scope 2, and significant categories of Scope 3 greenhouse gas emissions shall be tracked and documented at the facility and corporate level, and publicly reported. Suppliers shall look for cost-effective methods to improve energy efficiency and to minimize their energy consumption and greenhouse gas emissions. Suppliers shall conduct routine monitoring of the performance of its emissions control systems and submit its GHG emissions, targets, reductions, and progress with supporting documentation (as applicable) for review at least annually, or upon request. Suppliers are encouraged to assess climate-related risks to operations and develop adaptation strategies to ensure long-term resilience.

9) Boundary Noise

Suppliers shall identify, control, monitor and reduce noise generated by the facility that affects boundary noise levels.

10) Resource Consumption Management

Suppliers shall regularly quantify, set targets, monitor progress and reduce consumption of fossil fuel, water, hazardous substances and natural resources through conservation, re-use, recycling, substitution, or other measures.

D. ETHICS

To meet social responsibilities and to achieve success in the marketplace, Suppliers and their agents are to uphold the highest standards of ethics including:

1) Business Integrity

The highest standards of integrity shall be upheld in all business interactions. Suppliers shall have a zero-tolerance policy to prohibit any and all forms of bribery, corruption, extortion and embezzlement. All business dealings shall be transparently performed and accurately reflected on Suppliers' business books and records. Monitoring and enforcement procedures shall be implemented to ensure compliance with anti-corruption laws and regulations of the countries in which it and AOS operates including, but not limited to, the U.S. Foreign Corrupt Practices Act (FCPA) and applicable international anti-corruption conventions.

2) No Improper Advantage

Bribes or other means of obtaining undue or improper advantage shall not be promised, offered, authorized, given or accepted. This prohibition covers promising, offering, authorizing, giving or accepting anything of value (including cash or cash equivalents such as entertainment, gift cards, product discounts and non-business activities), either directly or indirectly through a third party, in order to obtain or retain business, direct business to any person, or otherwise gain an improper advantage. Suppliers shall have a process to investigate and report any violations. Monitoring, record-keeping and enforcement procedures shall be implemented to ensure compliance with anti-corruption laws. Supplier shall not seek to gain an advantage of any kind by acting fraudulently, deceiving people, making false claims, or allowing anyone else representing them to do so. This includes defrauding or stealing and any kind of misappropriation of property or information.

3) Disclosure of Information

All business dealings shall be transparently performed and accurately reflected in Suppliers' business books and records. Information regarding business activities, Suppliers' labor, health and safety, environmental practices, structure, financial situation and performance shall be disclosed in accordance with applicable regulations and prevailing industry practices. Falsification of records or misrepresentation of conditions or practices in the supply chain are unacceptable.

4) Intellectual Property

Intellectual property rights shall be respected. Transfer of technology and know-how is to be conducted in a manner that protects intellectual property rights, and customer information shall be safeguarded.

5) Conflict of Interest

Suppliers shall avoid all conflicts of interest or situations giving the appearance of a potential conflict of interest. Supplier will provide immediate notification to all affected parties in the event that an actual or potential conflict of interest arises. This includes a conflict between the interests of the supplier and / or its subcontractors and

personal interests or those of close relatives, friends or associates.

6) Fair Business, Advertising and Competition

Standards of fair business, advertising and competition shall be upheld.

7) Protection of Identity and Non-Retaliation

Programs that ensure the confidentiality, anonymity and protection of Supplier and employee whistleblowers shall be maintained unless prohibited by law. Suppliers shall have a communicated process for their personnel to be able to raise any concerns without fear of retaliation.

8) Responsible Sourcing of Minerals

Suppliers shall develop particular due diligence policies and management systems in order to identify applicable risks and take appropriate steps to mitigate them. Specifically, Suppliers shall adopt a policy and exercise due diligence on the source and chain of custody of the tantalum, tin, tungsten, gold, and cobalt in the products they manufacture to reasonably assure that they are sourced in a way consistent with the Organization for Economic Co-operation and Development (OECD) Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas or an equivalent (which include areas associated with conflict; worst forms of child labor, forced labor and human trafficking; indigenous peoples' and affected communities' rights impacts; gross human rights violations such as widespread sexual violence or other reasonably objective high risk activities, including severe health and safety risks and negative environmental impacts; and retaliatory threats, intimidation or attacks against human rights and environmental defenders) and recognized due diligence framework. Suppliers shall make their due diligence measures available to customers upon customer request.

9) Privacy

Privacy is considered to be a fundamental human right. Suppliers shall commit to protecting the reasonable privacy expectations of personal information of everyone they do business with, including suppliers, customers, consumers and employees. Suppliers shall comply with privacy, data protection, cybersecurity and information security laws and regulatory requirements when personal information is collected, stored, processed, transmitted and shared.

10) Information Security

Supplier shall maintain a security program that aligns with an industry standard such as NIST CSF, NIST 800-53, or ISO 27001/2. The program shall include technical and organizational measures to prevent misuse, compromise, loss, alteration or unauthorized disclosure, or acquisition of, or access to, confidential proprietary or protected information.

11) Community Engagement

Suppliers are encouraged to help foster social and economic development and contribute to the sustainability of the communities in which they operate.

12) C-TPAT and other Trusted Trader Programs

To the extent that Suppliers transport goods into the United States, Suppliers shall comply with the C-TPAT (Customs-Trade Partnership Against Terrorism) security procedures on the U.S. Customs website at www.cbp.gov or other website established for such purpose by the U.S. Government. To the extent that Supplier transports goods into countries other than the United States, Supplier shall comply with local programs and standards, as applicable, with the goal of facilitating compliant trade and securing the supply chain.

13) Cross-border Legal Requirements and Sanctions

Supplier shall comply with all applicable laws and regulations in performing its obligations, including all applicable employment, labor and human rights, health and safety, tax, export control and environmental laws and regulations. Without limiting this requirement Supplier shall not export, re-export, sell, resell or transfer any

customer data or any export-controlled commodity, technical data or software: in violation of any law, regulation, order, policy or other limitation (including requirements for export licenses or equivalent) imposed by the United States (including the United States Export Administration Regulations) or any other government authority with jurisdiction. Any such exports must have the necessary export licenses or governmental approval. Supplier agrees to retain all documentation and other information reasonably necessary to support or confirm its compliance with this paragraph and to provide such evidence upon request. Prior to providing any information or materials not classified as EAR99 with an Export Control Classification Number (ECCN) to AOS subject to the United States Export Administration Regulation, Supplier shall obtain AOS's prior written consent. If there are changes to classifications, export licenses and any other determinations related to information or materials previously provided, Supplier shall provide written notice, with supporting information and reason for such change.

E. MANAGEMENT SYSTEM

Suppliers shall adopt or establish a management system appropriate to the size, nature, and context of their operations, including, at a minimum, (a) a commitment to respect human rights and the environment; (b) a due diligence process and (c) access to remedy for internal and external stakeholders where a Supplier caused, or contributed to, adverse human rights and environmental impacts, whose scope is related to the content of this Code. The management system shall be designed to ensure: (a) compliance with applicable laws, regulations and customer requirements related to the Supplier's operations and products; (b) conformance with this Code and (c) identification and mitigation of operational risks related to this Code. It should also facilitate continual improvement.

The management system should contain the following elements:

1) Company Commitment

Suppliers shall establish human rights, health and safety, environmental and ethics policy statements affirming Suppliers' commitment to due diligence and continual improvement, endorsed by executive management. Policy statements shall be made public and communicated to workers in a language they understand via accessible channels.

2) Management Accountability and Responsibility

Suppliers shall clearly identify senior executive and company representative(s) responsible for ensuring implementation of their management systems and associated programs. Suppliers shall have a Corporate Social Responsibility or Sustainability representative that reports directly to executive management and has the responsibility and authority to manage social and environmental compliance requirements for their business. Suppliers' senior management shall review the status of the management system on a regular basis.

3) Legal and Customer Requirements

Suppliers shall have a process to identify, monitor and understand applicable laws, regulations and customer requirements, including the requirements of this Code.

4) Risk Assessment and Risk Management

Suppliers shall have a process: to identify the legal compliance, environmental, health and safety and labor and human rights practice and business ethics risks, including the risks of severe human rights and environmental impacts, associated with Suppliers' operations. Suppliers shall determine the relative significance for each risk; and to implement appropriate procedural and physical controls to control the identified risks and ensure regulatory compliance.

5) Improvement Objectives

Suppliers shall use written standards, performance objectives, targets and implementation plans to improve the

Suppliers' social and environmental, and health and safety performance, including a periodic assessment of Suppliers' performance in achieving those objectives.

6) Training

Suppliers shall develop and maintain management and worker training programs to facilitate proper implementation of their policies and procedures, to fulfill Suppliers' improvement objectives and to meet applicable legal and regulatory requirements.

7) Communication

Suppliers shall have a process, including an effective grievance mechanism, for communicating clear and accurate information about Suppliers' policies, practices, expectations and performance to workers, sub-tier suppliers and customers.

8) Worker/Stakeholder Engagement and Access to Remedy

Suppliers shall have processes for ongoing two-way communication with workers, their representatives, and other stakeholders where relevant or necessary. The process shall aim to obtain feedback on operational practices and conditions covered by this Code (including in relation to wages and benefits, workplace conditions, healthcare, living conditions, health and safety, environment, and education and training), and to foster continuous improvement by taking action in response to feedback where appropriate. Workers shall be given a safe environment to provide grievance and feedback without fear of reprisal or retaliation.

9) Audits and Assessments

Suppliers shall conduct periodic self-evaluations of their facilities and operations, and audit the operations of their subcontractors and next-tier suppliers to ensure conformity to legal and regulatory requirements, the content of this Code, and customer contractual requirements related to social and environmental responsibility.

Suppliers shall permit customers and a third party designated by a customer to periodically evaluate Suppliers' facilities and operations, and those of its subcontractors and next-tier suppliers, to the extent they are providing goods or services to a customer, for that customer's benefit, or for use in that customer's products.

Suppliers shall not have manufacturing operations in, recruit labor directly or indirectly from, or source materials, products, or services directly or indirectly from, regions where such customers or their third-party designates cannot access and conduct a comprehensive, independent evaluation of each Supplier's compliance with this Code.

10) Corrective Action Process

Suppliers shall have a process for timely correction of deficiencies identified by internal or external assessments, inspections, investigations and reviews.

11) Documentation and Records

Suppliers shall create and maintain documents and records to ensure regulatory compliance and conformity to company requirements along with appropriate confidentiality to protect privacy.

12) Supplier Responsibility

Suppliers shall have a process to communicate Code requirements to suppliers and to monitor supplier compliance to this Code.
